En data 2.3.2011, el director del Consorci Urbanístic del Centre Direccional de Cerdanyola del Vallès formalitza l'oferiment de la cessió de les obres d'urbanització de determinades obres d'urbanització.
El Consorci Urbanístic del Centre Direccional de Cerdanyola del Vallès té la condició d'administració actuant del polígon d'actuació urbanística Centre Direccional, corresponent-li com a tal, entre d'altres comeses, la urbanització del sector i posterior cessió a l'ajuntament.
Els serveis tècnics d'ambdues administracions estan col·laborant per a la formalització de la cessió de la propietat dels terrenys en què s'ha construït la vialitat.
El projecte inicial, d'obres complementàries respecte les bàsiques d'urbanització contingudes al Pla parcial, va ser aprovat per la Junta de Govern Local en sessió de 3.4.2007.
En data 22.9.2009, la Junta de Govern Local de l'Ajuntament de Cerdanyola del Vallès va aprovar la modificació núm. 2 del projecte d'Urbanització dels acabats del pont sobre la B-30, entre el Centre Direccional i la Universitat Autònoma de Barcelona.

Les obres realment executades estan recollides al projecte "as-built" lliurat pel Consorci.
L'article 169 del Reglament de la Llei d'urbanisme (aprovat per Decret 305/2006, de 18 de juliol) regula el lliurament i recepció de les obres d'urbanització; concretament, l'apartat 4 es refereix als supòsits en què l'execució no correspon a l'ajuntament.

*Primer.* **ACCEPTAR** la cessió per part del Consorci Urbanístic del Centre Direccional de Cerdanyola del Vallès de les obres del projecte del Tractament dels alçats, defenses i acabats del pont sobre l'Autopista AP-7 / B-30, entre el Centre Direccional de Cerdanyola del Vallès i la Universitat Autònoma. branes del pont + voreres del pont + voreres rotonda

## 1.- ANTECEDENTS

El Consorci Urbanístic del Centre Direccional de Cerdanyola del Vallès ha redactat un Pla de reparcel·lació urbanística que afecta a les edificacions existents de la parcel·la existent al carrer Boters, 2 de Cerdanyola del Vallès.

## 2.- OBJECTE

L'objecte del present document és el d'avaluar quantitativament el valor de les construccions en el seu estat actual.

## 3.- CONSIDERACIONS

La valoració de les edificacions s'ha fet d'acord amb l'establert al Reial Decret 1020 / 1993, de 25 de Juny, pel que s'aproven les normes tècniques de valoració i el quadre marc de valors del sòl i de les construccions.

El procediment de valoració parteix de l'assignació d'un valor a les construccions mitjançant un mètode normalment acceptat. En aquest cas s'utilitza el Butlletí Econòmic de la Construcció del 4rt trimestre de l'any 2020.

A aquest valor s'aplicaran criteris d'ajust, que reflectiran els condicionants de l'existència o no de certs elements constructius i coeficients correctors relatius a l'antiguitat de la construcció i al seu estat de conservació.

Els coeficients correctors estan definits al Reial Decret 1020 / 1993 esmentat.

## 4.- ÚS ACTUAL

Es tracta d'un conjunt de naus, destinades principalment a ús industrial (taller i magatzem). Cap d'elles disposa de Llicència d'Activitat.

## 5.- DESCRIPCIÓ DELS EDIFICIS

Les naus tenen estructures a base de pilars i jàsseres metàl·lics, de perfils normalitzats.

Els paviments són principalment de formigó, amb algunes zones de paviment ceràmic.

Els tancaments exteriors són d'obra de ceràmica, amb aïllament i acabat tipus monocapa. Pel que fa a les parets interiors, els acabats són arrebossats amb pintura plàstica.

Les cobertes són del tipus lleuger, amb panells de fibrociment no aïllats i no transitables, amb inclinacions a dos aigües i/o pendents únics, amb lucernaris de policarbonat distribuïts al llarg de les cobertes.

Les naus disposen d'instal·lació elèctrica i ventilació.

## 6.- ESTAT ACTUAL DELS EDIFICIS

Els elements estructurals i els tancaments exteriors dels edificis es troben en general en un estat de conservació acceptable, tot i que s'observa manca de manteniment.

Els elements interiors es troben en general en un de conservació més deficient degut a una manca de manteniment en elements com sostres, pintura, instal·lacions, etc.

A **l' Annex 3** s'adjunten fotografies on es pot apreciar l'estat actual de les edificacions.

## 7.- VALORACIÓ

### 7.1.- Criteri de Valoració

Es partirà de la valoració de construcció nova, segons els barems indicats al Butlletí Econòmic de la Construcció del quart trimestre de l'any 2.020.

Les dades de partida seran en funció de la tipologia de la construcció, en aquest cas:

- Nau industrial: partirem de la configuració tipus nau industrial.

En el nostre cas, considerem que en els edificis s'han de considerar diferents aspectes i factors que suposen un decrement en la seva valoració, que es recullen a la taula de càlcul del valor €/m$^2$ adjunta a **l'Annex 2** del present document

### 7.2.- Coeficients correctors

Els coeficients correctors d'aplicació en aquest cas són els relatius a l'Estat de Conservació (coeficient I) i a l'Antiguitat de la Construcció (coeficient H).

El coeficient I ve fixat pel quadre següent:

| Coeficient I | |
|---|---|
| Estat de conservació | Valor coeficient |
| Normal (construccions que, a pesar de la seva edat, qualsevol que sigui, no necessitin reparacions importants | 1 |
| Regular (constr. que presenten defectes permanents, sense que comprometin les normals condicions d'habitabilitat i estabilitat) | 0,85 |
| Deficient (const. que precisen reparacions de relativa importància comprometent les normals condicions d'habitabilitat i estabilitat) | 0,5 |
| Ruïnós (construccions manifestament inhabitables o declarades legalment en ruïna) | 0 |

En aquest cas es pren un valor de I=0,85.

El coeficient H s'obté del següent quadre:

| Coeficient H | | | | |

### 7.3.- Valoració

El càlcul de la valoració de l'edificació és:

• Valor de la construcció a nova: 304,14 €/$m^2$ (veure ANNEX 2)

• Coeficient d'antiguitat (H): 0,40

• Coeficient de conservació (I): 0,85

• Superfície considerada: 2.966 $m^2$

Valoració construcció = 304,14 €/$m^2$ x 0,4 x 0,85 x 2.966 $m^2$ = 306.706,94 €

**VALORACIÓ DE LA CONSTRUCCIÓ = 306.706,94 €**

## 3. Metodologia

El marc legal estatal de valoracions de sòl als efectes de l'equidistribució de càrregues i beneficis està establert en el Real Decreto Legislativo 7/2015, de 30 de octubre, por el que se aprueba el texto refundido de la Ley de Suelo y Rehabilitación Urbana, i el Real Decreto 1492/2011, de 24 de octubre, por el que se aprueba el Reglamento de valoraciones de la Ley de Suelo.

En concret, en l'article 27 del RD 1492/2011 s'estableix que *en la ejecución de actuaciones de transformación urbanística en la que los propietarios ejercitan la facultad de participar en régimen de equitativa distribución de beneficios y cargas, y salvo existencia de acuerdo específico suscrito por la totalidad de los mismos con la finalidad de ponderar las propiedades afectadas entre sí o, en su caso, con las aportaciones del promotor de la actuación o de la Administración actuante, el suelo se tasará por el valor que les correspondería terminada la ejecución, en los términos establecidos en el artículo 22 de este Reglamento*.

Aquest article 22 calcula, mitjançant el mètode residual, i a partir dels valors en venda dels productes immobiliaris obtinguts a partir d'un estudi de mercat estadísticament significatiu, els valors de repercussió del sòl, amb la següent fórmula de càlcul:

$$VRS = \frac{Vv}{K} - Vc$$

On:

VRS = Valor de repercussió del sòl en €/m2 edificable de l'ús considerat.

Vv = Valor en venda de el metre quadrat d'edificació de l'ús considerat del producte immobiliari acabat, calculat sobre la base d'un estudi de mercat estadísticament significatiu, en euros per metre quadrat edificable.

K = Coeficient que pondera les despeses generals, incloses les de finançament, gestió i promoció, així com el benefici empresarial normal de l'activitat de promoció immobiliària necessària per a la materialització de l'edificabilitat. Aquest coeficient K tindrà amb caràcter general un valor de 1,40.

Vc = Valor de la construcció €/m2 edificable de l'ús considerat. Serà el resultat de sumar els costos d'execució material de l'obra, les despeses generals i el benefici industrial del constructor, l'import dels

tributs que graven la construcció, els honoraris professionals per projectes i direcció de les obres, i altres despeses necessàries per a la construcció de l'immoble.

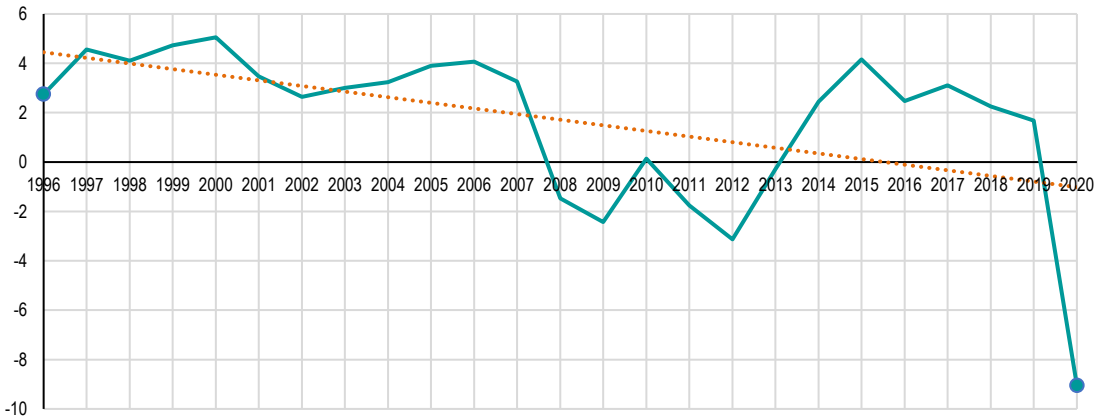

## 4. Context de mercat immobiliari actual

Atès que el PDU incorpora multiplicitat d'usos diversos (habitatge de protecció oficial, habitatge lliure, activitat econòmica en planta baixa, centre comercial, ús hoteler, terciari/oficines), per tal d'acabar fixant els coeficients d'homogeneïtzació cal acudir al mercat i auscultar el comportament de cadascun dels usos previstos.

El present Informe es redacta a febrer de 2021, és a dir, en plena pandèmia i crisi sanitària i econòmica mundial des del mes de març 2020. Pandèmia que està suposant un impacte sense precedents des de la implantació de les democràcia a España, i que ha suposat el segrest de les dinàmiques de mercat per un factor extern al funcionament ordinari de l'economia, la COVID-19.

Que la COVID-19 ha generat una aturada històrica de la producció és quelcom sabut i evident. Aquesta aturada, en termes anuals, ha suposat un decreixement del PIB espanyol de fins a més del -9% aquest darrer any 2020, amb pics màxims de caiguda entre el primer i el segon trimestre de 2020 de fins al -17,30%, la caiguda més gran i amb diferència dels darrers 25 anys.

Font: Instituto Nacional de Estadística / https://www.ine.es/consul/serie.do?d=true&s=CNTR4892&c=2&

A més a més, cal afegir que aquest comportament no és equivalent a tots els sectors, sinó que alguns sectors econòmics, per la seva naturalesa, han patit de manera molt més acusada l'aturada tan important. En el gràfic següent es posa de manifest l'impacte econòmic de la pandèmia en termes d'aturada i paràlisi de l'economia espanyola. Sector econòmics com el comerç, amb un decreixement que assoleix màxims del -44% o la construcció (amb decreixements màxims del -20) posen de manifest l'alteració profunda de la majoria de sectors que composen l'estructura econòmica del país i, de manera especial, aquells que son més sensibles a les restriccions a la mobilitat: turisme, comerç, cultura i esports, etc....

**Evolució del Producte interior brut a preus de mercat per sectors d'activitat (Variació trimestral 2019 – 2020 en %)**

Font: Instituto Nacional de Estadística / https://www.ine.es/dynt3/inebase/es/index.htm?padre=5614&capsel=5615

Com no podia ser d'altra manera, i tal com anirem desgranant en els propers apartats, aquesta aturada massiva de tota l'activitat econòmica ha tingut un impacte sense precedents sobre l'activitat immobiliària. El sector immobiliari, sobretot l'activitat promotora en els primers estadis del desenvolupament, compta amb un factor risc elevat, que és proporcional a la incertesa. Així doncs, iniciar un projecte immobiliari en moments excepcionals com l'actual, és multiplicar el risc, donat que el producte final del procés productiu de l'activitat immobiliària comporta un procés de maduració lent, de uns quants anys, fins que el producte arriba al mercat i genera un rendiment econòmic.

En aquestes circumstàncies d'aturada del sector immobiliari i de la construcció, institucions com el Banco de España han fet recomanacions escrites a les societats de taxació d'evitar fer valoracions referides al mercat ja que el col·lapse del mercat pot conduir a sobre o menysvaloracions importants dels actius a valorar[1].

## Els usos d'activitat econòmica en planta baixa (ACT)

La situació actual del comerç en planta baixa a casa nostra és d'un esfondrament sense precedents en l'estructura econòmica de Catalunya i Espanya. Els baixos comercials dels habitatges que donen vida a la ciutat i actuen com a proveïdors de béns i serveis als ciutadans, han sofert i s'agreuja dia a dia la seva situació derivada dels efectes, no solament del tancament del 2n trimestre de 2020, sinó de tot el continu de restriccions posteriors al normal desenvolupament de l'activitat, fet ha suposat, a més a més, una

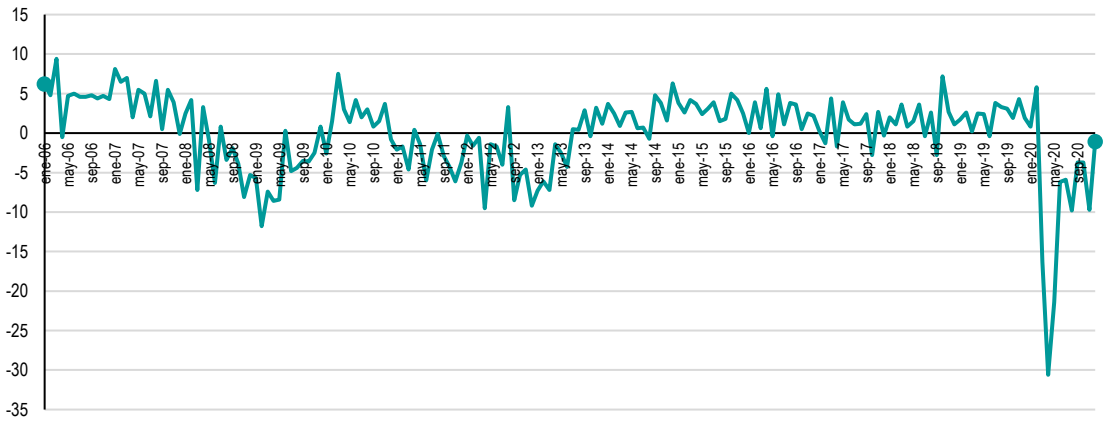

[1] https://www.expansion.com/economia/2020/04/21/5e9eab80468aeb952c8b45a4.html

reducció de vendes generada pel decrement de les rendes de les famílies com a conseqüència de la pandèmia de la COVID-19.

L'Índex de comerç al detall té com a objectiu proporcionar informació sobre les característiques fonamentals de les empreses dedicades a l'exercici minorista, servint com a indicador de l'evolució del sector del comerç al detall. Com es pot observar, aquest darrer any 2020 l'índex assoleix un comportament absolutament excepcional, assolint xifres màximes d'enfonsament del -31% el mes de març de 2020 i arrossegant el període més llarg de tota la sèrie amb decreixements acumulats mensuals fins al darrer mes disponible de la sèrie (desembre 2020).

En definitiva, el període de confinament de la població coincideix amb una davallada històrica de l'índex sense precedents, i també com amb posterioritat i coincidint amb la reobertura del país l'índex augmenta però arrossegant decreixements acumulats i sense arribar, en cap cas, als nivells previs a l'esclat de la pandèmia.

Font: Idescat / https://www.idescat.cat/indicadors/?id=conj&n=10269&col=3

El mateix comportament succeeix si ens fixem en l'evolució del volum de negoci del comerç al detall i del sector de la restauració. Com es pot veure en el gràfic següent l'aturada d'aquests dos sectors ha desembocat en unes reduccions dels volums de negoci de fins a un màxim del 60% en el cas del sector del comerç i del 92% el cas del sector de la restauració. I tots dos sectors continuen acumulant decreixements mensuals fins al desembre de 2020.

Font: Idescat / https://www.idescat.cat/indicadors/?id=conj&n=10266&col=2

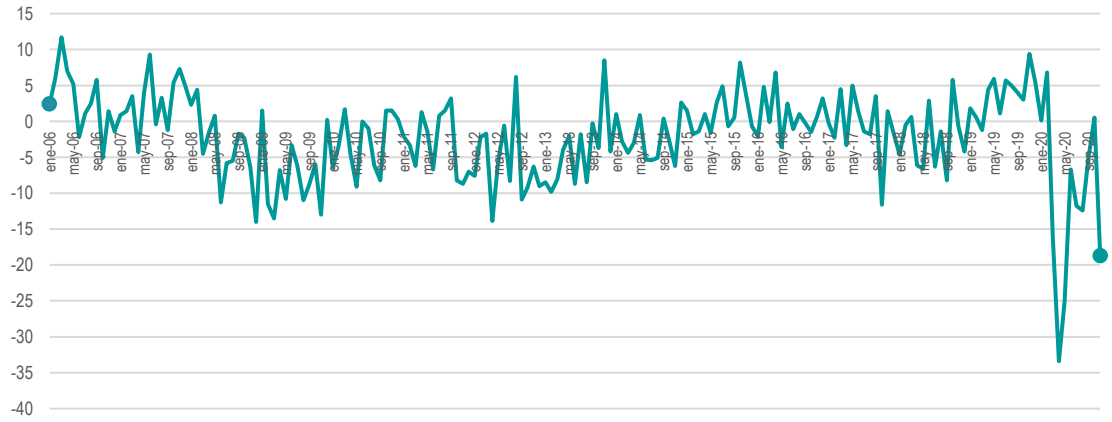

Els indicadors econòmics que il·lustren el comportament del sector comercial en planta baixa ens posen de manifest que, avui, aquest sector és pràcticament inexistent i resta pràcticament aturat, acumulant unes pèrdues i volums de negoci que fa que estiguem en una situació excepcional, sense cap precedent en tota la història contemporània del país i, el que és més important de cara a l'objecte del present treball, que aquest esfondrament i pràcticament desaparició del sector no és degut a una variable endògena del mecanisme de mercat, sinó conseqüència d'un impacte directe generat per una variable exògena al funcionament ordinari de l'economia (el virus de la COVID-19).

### Els usos d'activitat econòmica centres comercials (PC4)

Pel que fa al comportament dels centres comercials, també ha estat un sector econòmic que ha patit totes les restriccions, tant les permanents com les puntuals i, actualment, encara forma part de les activitats més castigades per les mesures anti COVID-19 limitatives de l'activitat de determinats sectors.

La reducció dels aforaments, limitant les afluències, així com el recorregut dels clients que ha hagut de adaptar-se a les noves normatives, quan no la simple prohibició d'obertura dels establiments, han afectat de manera directa el volum de vendes en aquest tipus d'establiments comercials. Tal com mostra el gràfic següent, l´índex de vendes de les grans superfícies s'ha enfonsat aquest darrer any fins a xifres màximes de decreixement iguals al -33%, i aquest decreixement continua amb decreixements de fins al 19% l'últim mes de desembre de 2020.

**Evolució de l'Índex de vendes de grans superfícies (en percentatge, 2006 – 2020)**

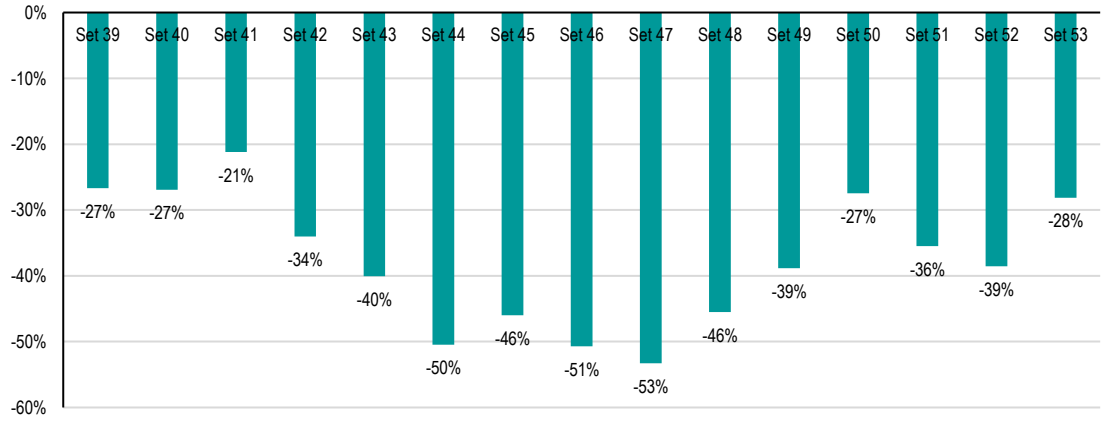

Font: Idescat / https://www.idescat.cat/indicadors/?id=conj&n=10268&col=3

En comparació amb l'any 2019, aquest darrer any 2020 ha acabat amb un impacte en les afluències als centre comercials amb xifres màximes de descens que superen el 50% en les darreres setmanes de l'any respecte l'any anterior[2], a les que s'hauria de sumar el tancament total que han patit els centres comercials a Catalunya durant molts mesos d'aquet any 2020. I aquest any 2021 les restriccions obligatòries continuen i la incertesa futura és igual de vigent que l'any passat.

[2] COVID-19 Impacto en property management, MVGM (Enero 2021) / https://www.mvgm.es/wp-content/uploads/2020/10/MVGM-Espana-COVID-19-Impacto-en-Property-Management.pdf

Font: Idescat / https://www.idescat.cat/indicadors/?id=conj&n=10268&col=3

Els tancaments totals i parcials soferts, el brutal descens del turisme, la cancel·lació de les celebracions pròpies de les festivitats locals, la restricció dels desplaçaments, col·loquen les afluències en unes xifres mai abans vistes. La perspectiva de cara a aquest any 2021 és, avui, equivalent a l'any passat, i condicionada a l'evolució del virus i a les restriccions que segueixin imposant les autoritats sanitàries. Amb l'arribada de la tercera onada de la COVID-19 a tot el país, la realitat dels centres comercials és nou tancaments obligats d'establiments i allargament de la incertesa futura.

## Els usos d'activitat hotelera (PC4H)

El sector hoteler ha estat un dels sectors econòmics més severament castigat per la COVID-19 i les restriccions a la mobilitat per aturar-ne l'expansió. Així doncs, l'arribada de turistes a Catalunya ha sofert una caiguda històrica i mai vista l'any 2020, passant de marcar màxims de 2,5 milions de turistes en temporada alta entre els anys 2015 i 2019, a menys de 0,5 l'any 2020 (sense tenir en compte les xifres nul·les dels mesos d'abril i maig de 2020).

**Nombre de turistes a Catalunya (2019-2020)**

Font: INE / https://www.ine.es/jaxiT3/Tabla.htm?t=10823

Aquestes dades per a Catalunya venen ratificades en el conjunt de l'estat espanyol, tota vegada que les darreres dades publicades per l'INE xifren les pernoctacions en hotels el mes de novembre de 2020 un 85% per sota que en el mes de novembre de 2019, i l'ingrés mig diari per habitació disponible (RevPAR) un 73% menys que en el mes de novembre de l'any anterior (és a dir, un sector econòmic absolutament desaparegut i a l'espera, d'aquell qui pugui aguantar, d'una reactivació del turisme un cop la pandèmia quedi enrere).

En aquest cas, la recuperació del sector va lligada a les campanyes de vacunació, ja que el turisme és un sector econòmic lligat majoritàriament a l'oci i que implica mobilitat i desplaçament, moltes vegades entre

àrees amb diferents nivells d'incidència epidemiològica, motiu pel qual contribueix a l'expansió del virus i és un dels primers sectors afectats quan s'endureixen les restriccions governamentals.

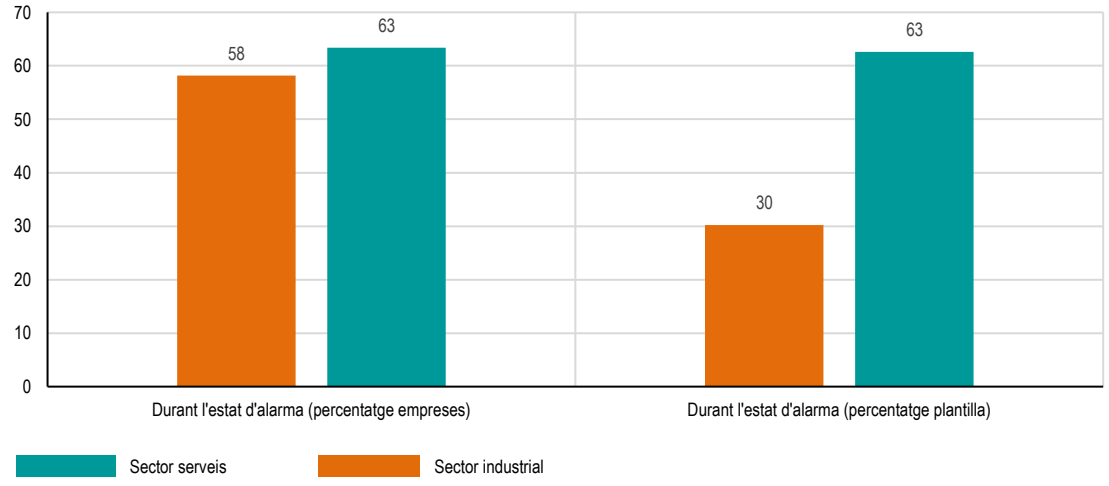

Així doncs, entre la caiguda del turisme i les restriccions, la major part dels establiments hotelers es troben tancats i esperant una millora de la situació sanitària per reprendre l'activitat o es plantegen la seva reconversió en altres usos. Això vol dir que el mercat hoteler en el moment present es troba absolutament aturat, sense activitat.

### Els usos d'activitat terciària (PC1 / PC2 / PC3 / PC4 / PC5)

El sector del PDU preveu un elevat contingent de sostre d'ús terciari oficines, amb l'objectiu de crear un parc empresarial al sector que permeti sinèrgies positives amb tot el complex d'alta tecnologia existent al sector (el sincrotró) i la Universitat Autònoma de Barcelona.

Pel què fa a les oficines, aquest darrer any 2020 la major part de les empreses han hagut d'adaptar-se al teletreball davant la impossibilitat de garantir unes mesures sanitàries mínimes pels seus treballadors, sobretot aquelles empreses amb una gran concentració de força de treball en un espai físic determinat. La següent gràfica és contundent i manifesta que durant l'estat d'alarma més d'un 63% de les empreses de l'estat espanyol han utilitzat el teletreball en el sector serveis, i en el sector industrial el percentatge se situa en el 58%. Pel que fa al percentatge de la plantilla, en el sector serveis se situa en el 62% i en el sector industrial en el 30%.

La incertesa generada per l'alarma sanitària ha disparat un fenomen que no quallava en la nostra cultura empresarial: el teletreball. La transformació que comporta el teletreball a l'àmbit empresarial, laboral i domèstic ha generat un abans i un després sense que hi hagi cap certesa sobre la magnitud futura que pot assolir. El fet però és que durant l'any 2020, el teletreball s'ha imposat. i plana un gran interrogant sobre com resoldre el desajust entre espais terciaris contractats i realitat actual del teletreball. En paral·lel, l'atractiu de Barcelona i els processos de concentració empresarial plantegen necessitats de nous edificis corporatius que la ciutat no té disponibles. Per tant, es combinen en el terciari una dinàmica dominant imposada pel teletreball amb demandes puntuals d'edificis corporatius que venien gestant-se des d'abans de la COVID-19..

La incertesa generada per l'alarma sanitària ha obert un procés de renegociació dels espais contractats i de redisseny de bona part dels pocs projectes en curs. La instrucció més corrent avui per part de la demanda és: *wait and see*.

Tal com mostra el gràfic següent, tan el volum de superfície contractada, com el nombre de contractació tancada i els volum d'inversió en el sector ha patit un sotrac mai vist des de que es tenen dades disponibles.

Segons informació publicada per *Savills Aguirre Newman*, aquest darrer any 2020 s'ha assolit el volum de superfície contractada més baix de la sèrie històrica disponible, i amb una reducció del 60% respecte l'any anterior.

La situació d'incertesa generada per la crisi sanitària ha parat o alentit el canvi d'oficines, el que ha paralitzat l'activitat en el mercat. Moltes empreses han optat per esperar a tenir major visibilitat de la nova situació després de valorar el possible impacte del teletreball en la seva activitat i en les noves necessitats d'espai (ampliar, reduir o redissenyar).

## L'habitatge de renda lliure (R-HLL)

Aquest context de paràlisi i incertesa en els mercats afecta a tota l'activitat de valoració econòmica d'actius reals i, especialment, en el sector immobiliari residencial. Tant és així que, aquest problema de país i del funcionament del seu sistema econòmic, s'ha traduït en una situació sense precedents que ha obligat al Banc d'Espanya a emetre un comunicat el 20 d'abril de 2020 a les societats de taxació d'Espanya en el que s'explicitava i insistia en que el mercat es troba en un elevat grau d'incertesa pel que fa a les valoracions i, en conseqüència, pregava a les societats de taxació que evitessin referenciar les valoracions aplicant el mètode de comparació amb el mercat o, fins i tot, rebutjar l'encàrrec[3].

Efectivament, el col·lapse del mercat immobiliari residencial es percep en tota la sèrie d'estadístiques publicades pel propi Banc d'Espanya (veure gràfics següents).

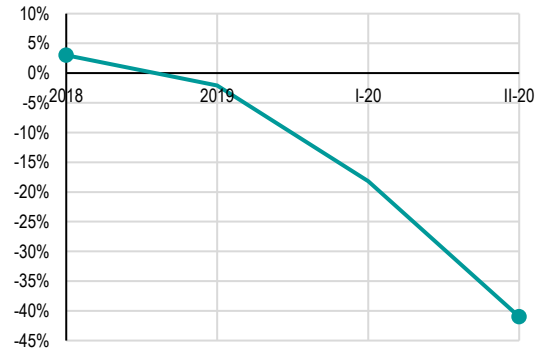

A nivell d'Espanya la superfície visada de nous habitatges assoleix una paràlisi sobtada que suposa reduccions acumulades de més del 35%, les inversions en habitatge pateixen un decrement acumulat de pràcticament el 34%, el volum de producció del sector de la construcció en l'àmbit de l'edificació s'ha reduït en pràcticament el 30% en el primer semestre de l'any 2020, i el consum de ciment (indicador relacionat amb el grau d'activitat del sector de la construcció) assoleix una xifra de decreixement acumulat durant el primer semestre de 2020 del 35%, assolint un volum de consum que no s'assolia des de l'any 1968[4].

Les transaccions de compravendes d'habitatge a la província de Barcelona han patit caigudes que superen el 40%, en termes de superfície visada

Si ens aproximem a l'entorn específic del PDU i prenem com a referència els municipis tinguts en compte a l'hora d'analitzar la viabilitat econòmica i financera del PDU[5], veurem que l´únic municipi que manté una dinàmica positiva és Sant Cugat del Vallès. Efectivament, sense tenir en compte el municipi de Sant Cugat del Vallès, el nombre de transaccions de compravenda d'habitatge lliure d'obra nova ha minvat en més d'un 50% en el darrer any disponible (2020), fet que indica el col·lapse sobtat del mercat immobiliari residencial.

[5] Cerdanyola del Vallès, Sant Cugat del Vallès, Badia del Vallès, Montcada i Reixac, Castellbisbal i Ripollet.

A nivell de l'AMB, Sant Cugat del Vallès i Castelldefels ja fa anys que constitueixen mercats residencial amb preus de la banda alta del mercat. I com que de les darreres crisis econòmiques, qui en surt més ben parat son els no assalariats, els mercats més cars de l'entorn metropolità son els que millor han aguantat les crisis. Però, de mercats residencials *prime* hi ha els que acabem de citar, amb alguns afegitons com poden ser una part de Sant Just Desvern, de Sant Boi de Llobregat i de Tiana.

En tot cas, Montcada i Reixac, Ripollet, Cerdanyola, Rubí o Castellbisbal, no son mercats *prime*, no son mercats com Sant Cugat. Quan aquells mercats han perdut tota activitat, agafar com a referent Sant Cugat, suposaria sobrevalorar el sostre residencial del PDU com si fos un miratge sense cap base real.

**Proposta d'ordenació de l'edificació i els espais lliures PDU**

Font: Generalitat de Catalunya

A més, el PDU justament ordena urbanísticament l'àmbit relligant el teixit residencial a Cerdanyola i no pas a Sant Cugat de manera que el sostre residencial del PDU està estretament vinculat al teixit urbà de Cerdanyola i no al de Sant Cugat, raó per la que les dinàmiques de mercat més rellevants serien les de Cerdanyola. Quan els municipis de Cerdanyola, Ripollet o Montcada i Reixac han sofert el col·lapse del mercat immobiliari per la COVID-19, emmirallar el sostre residencial del PDU en les dinàmiques de mercat residencial de Sant Cugat seria un exercici merament virtual, del tot esbiaixat, i irreal.

### L'habitatge amb protecció oficial (R-HPC / R-HPO)

La Disposició transitòria cinquena del Decret Llei 17/2019, del 23 de desembre, de mesures urgents per millorar l'accés a l'habitatge estableix, en el seu punt 1, que mentre no s'estableixi el preu de venda bàsic dels habitatges amb protecció oficial (genèric o específic) i el factor de localització assignat a cada municipi a què fa referència l'article 83 bis de la Llei 18/2007, de 28 de desembre, del dret a l'habitatge, ni s'aprovi un nou pla pel dret a l'habitatge adaptat a les determinacions d'aquest Decret llei, és aplicable el sistema de determinació dels preus de venda i de les rendes màxims d'acord amb el règim anterior.

Tota vegada que aquests nous preus no han estat publicats, i prenent com a referència els preus dels habitatges en règim de protecció oficial, cal tenir en compte que el dia 11 de desembre de 2020 es va publicar al DOGC el Decret Llei 50/2020, de mesures urgents per estimular la promoció d'habitatge amb protecció oficial i de noves modalitats d'allotjament en règim de lloguer. Aquest DL fou validat pel Ple de la Diputació Permanent del Parlament de Catalunya el proppassat 13 de gener de 2021.

L'article 1 d'aquest DL afegeix una disposició transitòria al DL 17/2019, la cinquena bis, que estableix els nous mòduls màxims de venda i les rendes màximes dels habitatges amb protecció oficial d'acord amb el règim anterior a l'entrada en vigor del Decret Llei 17/2019, de 23 de desembre, de mesures urgents per millorar l'accés a l'habitatge.

Si comparem aquests preus màxims de mòdul amb el comportament dels preus de mercat de l'habitatge lliure a Cerdanyola del Vallès veurem que tant els preus mínims realment transaccionats dels habitatges d'obra nova i de segona mà se situen o molt propers o fins i tot molt per sota d'aquests preus màxims de mòduls (veure gràfic següent). Per tant, en termes generals, a Cerdanyola del Vallès l'habitatge protegit existeix un alternativa competitiva en termes de mercat que exclouria la possibilitat d'assolir els preus màxims dels mòduls previstos, ja que actualment aquesta funció podria complir-la part de l'oferta en el mercat de l'habitatge lliure.

## 5. Coeficients d'homogeneïtzació dels diferents usos previstos

Com s'ha pogut veure, tots els sectors d'activitat immobiliària que tenim al PDU han quedat segrestats i atrapats per l'aparició de la pandèmia generant una dinàmica d'inactivitat de mercat, de manera que avui no existeix l'entorn de mercat a partir del que poder determinar nous valors de repercussió del sòl dels diferents usos previstos al PDU a partir d'un estudi de mercat representatiu d'un funcionament de mercat ordinari i estadísticament significatiu.

El context no afecta solament PDU sinó a tota l'activitat de valoració econòmica d'actius reals. És, per tant, un problema de país i de funcionament del seu sistema econòmic durant aquests temps convulsos.

Davant d'aquesta situació extraordinària, el 20 d'abril de 2020, el propi Banc d'Espanya va trametre a les societats de taxació un escrit en el que explicitava que *"en la situació actual, a l'haver desaparegut pràcticament les transaccions, no existeixen testimonis actualitzats que reflecteixin la nova situació. En un futur, esperem que sigui proper, en el que s'iniciï la fase de recuperació de les transaccions, es visualitzarà el nivell de preus que es pugui preveure"*[6].

[6] https://www.expansion.com/economia/2020/04/21/5e9eab80468aeb952c8b45a4.html

La missiva insistia en que fins que el volum de mercat no assoleixi un volum de mercat normalitzat, sense l'efecte exogen que condiciona els mecanismes de mercat, existirà un elevat grau d'incertesa en les valoracions que s'hagin de fer en termes de mercat. En aquest escenari, el Banc d'Espanya pregava a les societats de taxació que evitessin referenciar les valoracions aplicant el mètode de comparació amb el mercat o, fins i tot, rebutjar l'encàrrec.

Les valoracions del sòl en els projectes reparcel·latoris venen regulades pel Real Decreto Legislativo 7/2015, de 30 de octubre, por el que se aprueba el texto refundido de la Ley de Suelo y Rehabilitación Urbana, d'acord amb el seu art. 34.1 a). Per la seva banda, el Real Decreto 1492/2011, de 24 de octubre, por el que se aprueba el Reglamento de valoraciones de la Ley de Suelo, estableix a l'art. 22 relatiu a la valoración en situación de suelo urbanizado no edificado, on *Vv = Valor en venta del metro cuadrado de edificación del uso considerado del producto inmobiliario acabado, calculado sobre la base de un estudio de mercado estadísticamente significativo, en euros por metro cuadrado edificable*.

L'aportació de dades estadístiques al present Informe posen de manifest la manca de representativitat del mercat com per poder obtenir resultats estadísticament significatius i representatius d'un mercat normalitzat en el moment de redactar el present Informe.

Davant d'aquesta situació insòlita, qualsevol auscultació del mercat en data febrer 2021 per a la fixació dels coeficients d'homogeneïtzació a incloure en el projecte de reparcel·lació no troba el mínim nivell de normalitat que garanteixi la confiança estadística que obliga el RDL 7/2015 i el RD 1492/2011 que la desenvolupa. Que el Banco d'España es posicioni i demani evitar valoracions pel mètode comparatiu de mercat, evidencia lo insòlita de la situació actual i la prioritat d'evitar valoracions incertes per les imprevisibles conseqüències que poden generar.

Estem en un instrument de reparcel·lació urbanística on l'objecte central és definir el valor relatiu (en termes de valor de repercussió del sòl, VRS) dels diferents usos previstos en el PDU. I en funció dels VRS, repartir costos i beneficis del planejament, garantint en tot moment la justa equidistribució d'aquests, tal i com determina l'article 124 del TRLU. Doncs bé, el valor relatiu dels diferents usos no es pot determinar a data d'avui per la inactivitat del mercat exposada a les pàgines anteriors. Hem vist que la inactivitat és més intensa en uns usos que en uns altres, però es tracta d'una situació de no mercat normalitzat que domina els principals usos del PDU. En conseqüència, no hi ha valors actuals de mercat que siguin significatius i permetin determinar el valor relatiu dels diferents usos.

Tanmateix, no podem obviar que en relació a la temporalitat de les valoracions contingudes en els projectes de reparcel·lació, és l'article 131.1 del Decret 305/2006, de 18 juliol, pel qual s'aprova el Reglament de la Llei d'Urbanisme el que determina que "(...) *la data de referència de les valoracions contingudes en el projecte de reparcel·lació és la de la seva aprovació inicial, i s'actualitzen en l'aprovació definitiva d'acord amb l'interès legal del diner a partir del transcurs de sis mesos des de l'aprovació inicial*)".

Per tant, s'escauria que en compliment d'aquest precepte es dugués a terme la valoració de tots els aprofitaments previstos en el PDU, i que han de ser objecte de repartiment en la reparcel·lació.

Ara bé, aquesta obligació legal provoca que es produeixin dues antinòmies jurídiques, atès que existeixen dues normes que concorren en un mateix àmbit temporal i material, però que atribueixen conseqüències jurídiques incompatibles entre ambdues, i això impedeix la seva aplicació simultània, ja que el compliment o aplicació d'una d'elles implica com, ara s'acreditarà, la violació de l'altre.

Així, una primera contradicció jurídica és la derivada d'haver d'aplicar un mètode de valoració que parteix de la necessitat de disposar d'un estudi de mercat estadísticament significatiu (d'acord amb Reals Decrets 7/2015 i 1492/2011) referits a un moment temporal (el que preveu l'article 131.5 del RLU) en el que per causes alienes al mercat, fortuïtes i de força major, és d'impossible aplicació, tal i com s'ha justificat al llarg del present informe.

La segona antinòmia legal que es planteja, de forma si es pot més evident, és en el sentit que, per l'aplicació del previst al Decret 305/2006, d'una banda, cal disposar d'una valoració de mercat en el moment d'aprovar inicialment el projecte de reparcel·lació, i aquesta valoració ha de fer-se amb els requisits i sistema de valoració que recullen els Reals Decrets 7/2015 i 1492/2011 i que seria de reglat compliment en el referit projecte, però, per contra la seva aplicació comportaria una infracció frontal de la resta de requisits legals de necessària observança en el procés reparcel·latori, sent el principal d'ells, l'imprescindible equilibri entre els beneficis i les càrregues derivades del planejament (articles 117, 124, 126 del TRLU i concordants del RLU), perquè la situació d'excepcionalitat actual llargament exposada, i la conseqüent desvirtuació de tota valoració a dia d'avui, fa impossible una correcta ponderació dels diferents aprofitaments, i per tant, el trencament de qualsevol equilibri.

Quan la norma (article 22 del Reglamento de valoracions de la Ley de Suelo) estableix que la valoració ha d'anar referida a valors de mercat estadísticament significatius, és justament per evitar les imprevisibles conseqüències d'emmirallar-se en un mercat inexistent. Si avui, aquest mercat no existeix, els valors de mercat significatius més recents son els anteriors a la COVID-19 que es corresponen amb els valors incorporats al Pla Director Urbanístic del Centre Direccional de Cerdanyola del Vallès aprovat definitivament el 22 de desembre de 2020 i publicat el 11 de febrer de 2021. Aquells son els darrers valors de mercat normalitzat i estadísticament significatius, i que garantien una proporcionalitat i correcte ponderació entre els diferents coeficients homogeneïtzadors de les tipologies i usos previstes al PDU.

És per tot l'exposat que, per garantir el principi general de seguretat jurídica de qualsevol actuació administrativa, es considera necessari mantenir i aplicar al Projecte de reparcel·lació del sector Parc de l'Alba del PDU del Centre Direccional de Cerdanyola del Vallès, els valors i coeficients de l'estudi de mercat de que es disposa, això és, el del referit PDU, tot i el transcurs de més de 18 mesos des de la seva elaboració. En qualsevol cas, la possible desviació temporal dels coeficients d'homogeneïtzació pel transcurs del citat termini de 18 mesos seria mínima, respecte a la mateixa possible desviació segons mostres que no compleixin amb els requisits necessaris per donar seguretat jurídica a la valoració, i això provocaria un incompliment total del principi de justa distribució dels beneficis i càrregues que és el principi general impulsor de tota la reparcel·lació i al que sempre s'ha de donar compliment final.

En darrer terme cal apuntar que, tot i l'entrada en vigor del Decret Llei 50/2020, que com s'ha dit estableix els nous mòduls màxims de venda i les rendes màximes dels habitatges amb protecció oficial, en coherència amb tot el que s'ha esmentat fins ara, i en tant que els preus que es fixen són preus màxims, és conclou necessari, per evitar desvirtuar la proporcionalitat i equilibri entre els diferents usos, mantenir els preus de l'habitatge amb algun règim de protecció fixats per l'estudi de mercat del PDU i no incorporar els preus que per aquestes tipologies actualitza el Decret, atès que com s'ha dit, són els valors de l'estudi de mercat del PDU el marc legal i vàlid de valoració dels aprofitaments derivats de l'ordenació urbanística del sector Parc de l'Alba.

*"10.- La subclau de Sistema d'espai lliure, Parc Estratègic en transformació (Parc de Collserola/RPT) SV1/RPT, constitueix una qualificació de Sistema d'espai lliure de cessió obligatòria que el Pla director urbanístic atorga a uns terrenys inclosos al sud de l'àmbit, edificats amb llicències provisionals, i amb activitat econòmica, als quals se'ls hi atorga un règim transitori durant el termini temporal màxim de 15 anys.*

- *Aquesta subclau del Pla director, defineix i regula la transformació a sistema d'espai lliure dels terrenys situats en el Parc Natural de Collserola, edificats i amb activitat econòmica, en part de la finca identificada com parcel·la 16 del polígon 10 del Cadastre de rústica, i la part construïda identificada amb referència 042200100DF29D i que el PDU inclou amb un règim específic en el Sistema d'espais lliures, Parc Estratègic (Parc de Collserola) SV1, atorgant-li la naturalesa de terrenys de cessió obligatòria afectats per un règim transitori.*

- *En execució del planejament aquests terrenys formaran part del procés reparcel·latori lliurant-se la propietat, per cessió obligatòria, a l'Ajuntament de Cerdanyola, si bé mantenint el seu titular la possessió fins al tancament de l'activitat o del termini temporal atorgat dels 15 anys, comptat a partir de l'entrada en vigor del PDU. En la descripció de la finca, destinada a sistemes d'espais lliures, en el Projecte de reparcel·lació s'inclourà les condicions establertes del seu règim transitori.*

- *En la redacció del Projecte de reparcel·lació s'adjudicarà al titular de les finques afectades pel règim transitori l'aprofitament corresponent per l'aportació de la superfície que en el procés reparcel·latori passarà a ser (SV1/RPT). S'haurà de fer constar la condició suspensiva respecte de la capacitat de disposició plena i lliure dels drets dominicals fins que es faci efectiu el cessament de l'activitat, moment en que el seu titular haurà de fer l'enderroc de les construccions i paviments així com la possible descontaminació del sòls que hi pugui haver a la finca aportada i el compliment de la resta de condicions relacionades amb el restabliment de la finca al seu estat natural.*

- *En el moment del cessament de l'activitat i restabliment de la finca al seu estat natural es formalitzarà la cessió per part del titular de la possessió de la parcel·la SV1/ RPT, a favor de l'Ajuntament de Cerdanyola del Vallès, i aquests terrenys passaran a formar part del Sistema d'espais lliures, Parc Estratègic (Parc de Collserola) SV1, i es procedirà també a la cancel·lació de la condició suspensiva.*

- *Prèviament el titular de l'activitat haurà d'acreditar documentalment la deconstrucció i sanejament del sòl de conformitat amb la normativa ambiental aplicable. L'Ajuntament haurà de procedir a la comprovació de l'estat de la finca en un termini màxim de dos mesos, que es podrà prorrogar si s'han de demanar informes o analítiques de conformitat amb la normativa ambiental. Un cop comprovat, es procedirà a la transmissió de l'aprofitament retingut.*

- *En el moment de fer-se efectiva la cessió de la possessió dels terrenys qualificats de SV1/ RPT a l'Ajuntament de Cerdanyola del Vallès, al seu titular no li correspondrà cap indemnització ni per l'activitat, ni per les edificacions i vols, atès les condicions del règim provisional de les llicències obtingudes i el règim transitori atorgat pel PDU.*

- *Si transcorregut el termini establert per l'ús transitori, la propietat no ha cessat l'activitat ni lliurat la possessió en les condicions exigides, l'administració actuant o l'Ajuntament de Cerdanyola del Vallès podran ocupar-la per si mateixos i subsidiàriament efectuar la deconstrucció i sanejament, amb càrrec a l'aprofitament retingut en garantia, podent aplicar-se una clàusula penal, consistent en el 20% de l'aprofitament retingut per cada any de retard en el compliment total de les seves obligacions*

- *Durant la vigència del termini temporal el règim transitori d'usos i d'edificació de la finca inclosa en l'àmbit del sector amb la qualificació (SV1/ RPT), la finca es regirà per les següents condicions:*

i. *No està permesa cap altre ús o activitat diferent dels relacionats en la documentació presentada a l'Ajuntament l'any 2006, que es concreta en "activitat de magatzem de materials, vehicles,¡ i maquinària de la construcció i obres públiques i oficines d'administració.*
ii. *Les condicions d'edificació de les edificacions es limitaran a les admeses per la legislació vigent pels edificis en situació de fora d'ordenació."*

*Identificació de les infraestructures de afectació:*

**Les infraestructures ferroviàries que transcorren per l'àmbit del centre direccional i que, per tant, produeixen afectacions en el planejament urbanístic són les següents:**

- **Línia en servei: Ferrocarril Papiol - Mollet, gestionada per l'Administrador d'Infraestructures Ferroviàries (ADIF).**
- **Línia planificada, amb estudi informatiu de traçat aprovat: "Línia d'Alta Velocitat Madrid - Barcelona - Frontera Francesa. Tram: Lleida - Barcelona. Subtram: Martorell - Barcelona ".**

**En el plànol *o.8 Condicionants i afectacions sectorials (Compatibilitat amb la proposta d'ordenació)* s'identifiquen aquestes infraestructures, així com les zones de afectació corresponents.**

I pel que fa a la prolongació dels FGC, a continuació s'estableix:

> *'En aquest mateix plànol també es grafia la zona d'afectació dels dos possibles traçats ferroviaris del ramal de prolongació de la línia S-4 de Ferrocarrils de la Generalitat de Catalunya proposats pel Consorci a l'estudi d'Avaluació de la Mobilitat Generada d'aquest PDU. Com que es tracta d'una proposta, en aquest cas, aquestes línies només son de caràcter informatiu.'*

Finalment, cal tenir present **l'article 64 de les NNUU** del PDU, per a la "possible" zona d'afectació de 100 metres, per obres de nova construcció o remodelació de les existents, havent-se garantir la no afectació a aquesta infraestructura i es requerirà d'informe favorable de la DG d'Infraestructures de Mobilitat Terrestre.

**3.- Pel que fa al pla d'etapes i cronograma d'actuacions previst**

Pel que fa al calendari d'execució de les obres i al compliment del conveni de 2014, actualment la parcel·la PC11 01 disposa d'un accés realitzat durant les obres d'ampliació de la carretera BP1413 que es varen finalitzar l'any 2011, de conformitat amb les previsions del planejament llavors vigent, en què tot aquell àmbit era un gran equipament.

Pel que fa al pla d'etapes i cronograma d'actuacions previst, el Projecte d'urbanització que s'aprovi definitivament preveurà avançar l'inici de les obres d'urbanització dels serveis i accessos a les parcel·les PC1 11 01 i PC1 11 02 i 50 04 al primer any d'execució del Pla.

Finalment, el projecte complementari amb el qual es licitaran aquestes obres acabarà de definir com seran aquests accessos. L'aprovació d'aquest Projecte serà notificat als propietaris de les parcel·les PC1 11 01 i PC1 11 02 i 50 04.

**4.- Pel que fa a l'adjudicació de les parcel·les resultants.**

L'adjudicació de la finca resultant PC1-11 es subdivideix en dues resultants, la PC1-11.01 i la PC2-11.02. Atès que s'ha comprovat que la proporció de sòl i sostre entre les dues parcel·les

estaven intercanviades, el Projecte de reparcel·lació que s'aprovi definitivament adjudicarà correctament aquesta proporció.

Així mateix, l'adjudicació de les finques resultants del projecte reparcel·lació s'ha d'efectuar lliure de càrregues i ocupants. Mentre que el Sr. Puigfel no tingui la possessió de la parcel·la PC1-11.02, no en podrà fer el tancament i haurà de ser l'Ajuntament i el Consorci qui, un cop desallotjats els ocupants actuals, vetlli per tal que no s'ocupin de nou.

**5.- Pel que fa a les condicions del règim transitori i naturalització de la finca recollida a la descripció de la parcel·la PC1-11.02**

El Projecte de reparcel·lació que s'aprovi definitivament recollirà la descripció de la parcel·la adjudicada PC1-11.02 que s'ha descrit en l'acorden tercer del conveni.

En concret, en relació a la renaturalització es preveurà el següent:

- *'S'haurà de fer constar la condició suspensiva respecte de la capacitat de disposició plena i lliure dels drets dominicals fins que es faci efectiu el cessament de l'activitat, moment en que el seu titular haurà de fer l'enderroc de les construccions i paviments així com la possible descontaminació del sòls que hi pugui haver a la finca aportada i el compliment de la resta de condicions relacionades amb el restabliment de la finca al seu estat natural, d'acord amb les llicències obtingudes.*

- *En el moment del cessament de l'activitat i restabliment de la finca al seu estat natural es formalitzarà la cessió per part del titular de la possessió de la parcel·la SV1/ RPT, a favor de l'Ajuntament de Cerdanyola del Vallès, i aquests terrenys passaran a formar part del Sistema d'espais lliures, Parc Estratègic (Parc de Collserola) SV1, i es procedirà també a la cancel·lació de la condició suspensiva.*

- *Prèviament el titular de l'activitat haurà d'acreditar documentalment la deconstrucció i sanejament del sòl de conformitat amb la normativa ambiental aplicable. L'Ajuntament haurà de procedir a la comprovació de l'estat de la finca en un termini màxim de dos mesos, que es podrà prorrogar si s'han de demanar informes o analítiques de conformitat amb la normativa ambiental. Un cop comprovat, es procedirà a la transmissió de l'aprofitament retingut.*

- *En el moment de fer-se efectiva la cessió de la possessió dels terrenys qualificats de SV1/ RPT a l'Ajuntament de Cerdanyola del Vallès, al seu titular no li correspondrà cap indemnització ni per l'activitat, ni per les edificacions i vols, atès les condicions del règim provisional de les llicències obtingudes i el règim transitori atorgat pel PDU.*

- *Si transcorregut el termini establert per l'ús transitori, la propietat no ha cessat l'activitat ni lliurat la possessió en les condicions exigides exclusivament per causes imputables a SACESA l'administració actuant o l'Ajuntament de Cerdanyola del Vallès podran ocupar-la per si mateixos i subsidiàriament efectuar la deconstrucció i sanejament, amb càrrec a l'aprofitament retingut en garantia, aplicant-se una clàusula penal, consistent en el 20% de l'aprofitament retingut per cada any de retard en el compliment total de les seves obligacions.*

- *Durant la vigència del termini temporal el règim transitori d'usos i d'edificació de la finca inclosa en l'àmbit del sector amb la qualificació (SV1/ RPT), la finca es regirà per les següents condicions:*

  *i. No està permesa cap altre ús o activitat diferent dels relacionats en la documentació presentada a l'Ajuntament l'any 2006, que es concreta en "activitat de magatzem de materials, vehicles,¡ i maquinària de la construcció i obres públiques i oficines d'administració.*

  *ii. Les condicions d'edificació de les edificacions es limitaran a les admeses per la legislació vigent pels edificis en situació de fora d'ordenació."*

Finalment, el Projecte de reparcel·lació estableix que la prohibició de disposar serà cancel·lada si s'acredita el compliment de la cessió de la possessió de la finca SV1-03.01/RPT, estipulant-se un règim transitori de 15 anys que haurà de permetre a l'administració actuant l'ocupació del sòl, amb la correlativa desconstrucció i sanejament dels sòls, d'acord amb l'article 35.10 de les NNUU.

**6.- Pel que fa a la previsió dels serveis del Projecte d'urbanització.**

Pel que fa als serveis, l'estat actual i les previsions son les següents:

- Xarxa d'Aigua.- Existeix una canonada que donarà servei a les tres parcel·les. L'escomesa l'haurà de sol·licitar cadascun dels promotors de les parcel·les. L'escomesa l'haurà de sol·licitar cadascun dels promotors de les parcel·les i la connexió es podrà ubicar en el punt de la canonada que es prefereixi. Les escomeses seran a càrrec del promotor, com en la resta de parcel·les del sector Parc de l'Alba. Es corregirà el plànol del projecte d'urbanització 6.6.1 XARXA D'AIGUA (full 8 de 10), perquè no apareixia la canonada que dona aquest servei. Pel que fa al diàmetre d'aquestes canonades en relació al consum d'aquestes parcel·les, cal dir que aquestes estan calculades per AGBAR amb la sol·licitació d'hidrants anti-incendis i per tant, sobredimensionats pel consum d'aquestes tres parcel·les.
- Xarxa de Gas.- Existeix una canonada que pot donar servei a les tres parcel·les. L'escomesa l'haurà de sol·licitar cadascun dels promotors de les parcel·les i la connexió es podrà ubicar en el punt de la canonada que es prefereixi. Les escomeses seran a càrrec del promotor, com en la resta de parcel·les del sector Parc de l'Alba. Aquesta xarxa apareix al plànol 6.7.1 XARXA DE GAS (full 6 de 8). Com en el cas anterior, la canonada esta dimensionada per Gas Natural.
- Xarxa de Telecomunicacions.- La xarxa es va creuar provinent de la vorera nord, i a l'alçada de l'accés actualment construït, i s'allargarà fins a les altres dues parcel·les i s'executarà com a la resta del sector. Es recollirà en el plànol 6.8.1 Xarxa de Telecomunicacions (full 8 de 10).
- Xarxa elèctrica.- Actualment hi ha xarxa elèctrica en MT, un CET públic (enllumenat, etc), i un CET privat per una de les parcel·les. El promotor s'instal·larà els transformadors que la

seva activitat requereixi, com en la resta de parcel·les del sector Parc de l'Alba. En aquest sentit, caldrà instal·lar els CEM (centres de mesura) quan les parcel·les s'hagin de desenvolupar, i es situaran a on convingui en funció del projecte de la parcel·la, tal i com s'ha recollit al plànol 6.5.1 XARXA DE SUBMINISTRAMENT ELÈCTRIC (full 8 de 11).

D'altra banda, totes les parcel·les tenen assignada una potència de 125W/m2St. Segons l'annex de serveis, les parcel·les PC1.11.01 i PC1 11.02 tindran en total una potència de 3.825,8 kW. Si es requereix més potència que l'assignada, s'haurà de sol·licitar a la companyia. Les condicions en què es lliuraran les parcel·les seran les mateixes que la resta de parcel·les de l'àmbit, essent la companyia elèctrica qui rep la xarxa construïda i per tant s'haurà d'executar d'acord amb els seus criteris.

En el cas de la parcel·la 50.04 ja hi ha un centre de distribució instal·lat i en la PC1-11 01 hi ha un centre de transformació (subministrament en BT), de manera que caldrà instal·lar, en el moment en que la parcel·la s'hagi de desenvolupar, un centre de distribució a càrrec del Consorci. A la PC1-11.02 passarà el mateix. En el cas que les dues parcel·les PC11 es desenvolupessin conjuntament, només seria necessari instal·lar-ne un.

En el Projecte d'Urbanització que s'aprovi definitivament, la connexió elèctrica de les esmentades parcel·les, es farà a través d'alimentadors existents provinents de la subestació de Codonyers.

- Xarxes de pluvials i residuals.- El projecte d'urbanització preveurà la seva construcció pel Camí-10 de la urbanització, incloses les escomeses de pluvials i de residuals per a totes les parcel·les, amb una arqueta de registre en cadascuna d'elles. Aquesta xarxa s'ha grafiat en blau en el plànol "05. Planta General. Fases de Projectes". Plànol 6.3.1. XARXA DE PLUVIALS I RESIDUALS (full 9 d'11).

**7.- Pel que fa al nou pont a construir a la riera de Sant Cugat i a l'accés a la part de les finques propietat del Sr. Puigfel que queda fora de l'àmbit i que actualment s'hi accedeix des de SACESA.**

Respecte el nou pont, l'ACA ha autoritzat la seva construcció en l'informe d'aprovació del projecte d'urbanització de data 16 de setembre de 2021, però aquest no es construirà abans que SACESA hagi cedit els terrenys, de manera que el pont existent tampoc s'enderrocarà fins aquell moment.

Respecte a l'accés a la part de finques propietat del Sr. Puigfel fora de l'àmbit del PDU, actualment té accés des d'un camí ample que ve del barri de Monflorit pel qual hi pot circular maquinària agrícola. Aquest camí en arribar a la finca, baixa per la traça d'un torrent desaparegut, fins a la parcel·la de PUIGFEL.SA. Amb la construcció del nou pont, es generaran dos camins, un que creuarà l'actual parcel·la de PUIGFEL.SA. i connectarà amb un camí nou de límit dels bosc de Can Costa pel marge esquerre de la riera de Sant Cugat, i l'altre, que

connectarà amb el camí existent que hi ha sobre la traça del torrent desaparegut. També es connectarà el camí que ve del barri de Montflorit amb el nou camí abans esmentat, de límit de bosc a Can Costa, creuant just pel límit del PDU.

## 1.- ANTECEDENTS

En data 09-09-2021 es rep còpia del "Informe de Valoració d'una instal·lació esportiva de frontó. Can Costa – Cerdanyola del Vallès" redactat per l'Arquitecte Ramón Bacardit Reguant en data juliol de 2021.

## 2.- OBJECTE

L'objecte del present document analitzar la valoració efectuada, des d'un punt de vista tècnic-econòmic.

## 3.- CONCLUSIONS INFORME DE VALORACIÓ

### 3.1. PRESSUPOST D'EXECUCIÓ DE LA INSTAL·LACIÓ

L'import total de la valoració d'execució de la pista de frontó, abans d'aplicar els coeficients d'antiguitat i conservació, puja a la quantitat total de 149.809,41 €.

Per justificar aquest import, s'ajunta un pressupost desglossat en unitats constructives d'obra.

Les conclusions un cop analitzat el pressupost són les següents:

- Els amidaments que serveixen de base pel pressupost es basen en les dimensions d'una pista de frontó reglamentària i no de la pista existent. En concret la superfície en planta considerada és de 450 $m^2$ (30m x 15m), superior a la superfície existent, i l'alçada del mur considerada és de 15m, també molt superior a l'alçada existent. Aquest increment dels amidaments incideix directament en un increment del Pressupost d'Execució Material (PEM).

- El pressupost total de la valoració inclou el PEM, anteriorment comentat, el percentatge del Benefici Industrial (BI) i de les Despeses Generals (DG), i el 21% d'IVA. En les valoracions de les instal·lacions, el pressupost a considerar és l'anomenat Pressupost d'Execució per Contracte (PEC), que no inclou l'IVA. Per tant l'aplicació de l'IVA suposa un increment de la valoració total.

- El rati del cost de la instal·lació expressat en €/$m^2$, tenint en compte les dimensions d'una pista de frontó reglamentària (450 $m^2$), i l'import total de la valoració (149.809,41 €), és de 332,91 €/$m^2$. Aquest valor es considera excessiu si el comparem amb el rati de construcció d'una nau industrial, que és de 503,62 €/$m^2$ segons el "Boletín Económico de la Construcción" (s'adjunta còpia a l'Annex II del present informe), i inclou conceptes com ara cimentacions, estructures, sanejament, tancaments, instal·lacions, etc.

## 3.2. COEFICIENTS ANTIGUITAT I ESTAT DE CONSERVACIÓ

El resultat de la valoració, aplicant coeficients d'antiguitat de la instal·lació i l'estat de conservació de la mateixa, és de 77.178,23 €. Això suposa un coeficient de 0,515 aplicat al pressupost analitzat al punt anterior.

El valor d'aquest coeficient es considera superior al que s'hauria d'aplicar segons el Reial Decret 1020/199 de 25 de Juny, pel qual s'aproven les normes tècniques de valoració i el quadre marc de valors del sòl i de les construccions.

A continuació s'adjunten les taules per calcular els coeficients d'antiguitat i estat de conservació de la instal·lació:

3.2.1 Coeficient H, per tenir en compte l'antiguitat de la instal·lació:

**Coeficient H**

| Ús | | Anys Complerts | Ús 1 Cat. 3 a 6 | Ús 2 Cat. 3 a 6 | Ús 3 Cat. 3 a 6 |
|---|---|---|---|---|---|
| Ús 1 | Residencial, oficines edificis singulars | 0-4 | 1,00 | 1,00 | 1,00 |
| Ús 2 | Ind. no fabril, comerdial esportiu, oci i hosteleria turistic, sanitari i beneficència cultural i religiós | 5-9 | 0,92 | 0,91 | 0,90 |
| | | 10-14 | 0,85 | 0,84 | 0,82 |
| | | 15-19 | 0,79 | 0,77 | 0,74 |
| | | 20-24 | 0,73 | 0,70 | 0,67 |
| Ús 3 | Fàbriques i espectacles (incl. esportius) | 25-29 | 0,68 | 0,65 | 0,61 |
| | | 30-34 | 0,63 | 0,60 | 0,56 |
| | | 35-39 | 0,59 | 0,56 | 0,51 |
| | | 40-44 | 0,55 | 0,52 | 0,47 |
| Categoria: Prenem la categoria intermitja (3 a 6) | | 45-49 | 0,52 | 0,48 | 0,43 |
| | | 50-54 | 0,49 | 0,45 | 0,40 |
| | | 55-59 | 0,46 | 0,42 | 0,37 |
| | | 60-64 | 0,43 | 0,39 | 0,34 |
| | | 65-69 | 0,41 | 0,37 | 0,32 |
| | | 70-74 | 0,39 | 0,35 | 0,30 |
| | | 75-79 | 0,37 | 0,33 | 0,28 |
| | | 80-84 | 0,35 | 0,31 | 0,26 |
| | | 85-89 | 0,33 | 0,29 | 0,25 |
| | | 90-més | 0,32 | 0,28 | 0,24 |

En aquest cas, per un Ús 2 (Esportiu) i 46 anys d'edat (Construcció de l'any 1975) amb categoria intermèdia (3 a 6) : H= 0,48

3.2.2 Coeficient I, per tenir en compte l'estat de conservació de la instal·lació:

| Coeficient I | |
|---|---|
| Estat de conservació | Valor coeficient |
| Normal (construccions que, a pesar de la seva edat, qualsevol que sigui, no necessitin reparacions importants | 1 |
| Regular (constr. que presenten defectes permanents, sense que comprometin les normals condicions d'habitabilitat i estabilitat) | 0,85 |
| Deficient (const. que precisen reparacions de relativa importància comprometent les normals condicions d'habitabilitat i estabilitat) | 0,5 |
| Ruïnós (construccions manifestament inhabitables o declarades legalment en ruïna) | 0 |

En aquest cas es considera que l'estat és deficient i es pren un valor de I=0,5.

En conclusió, el coeficient total a aplicar, tenint en compte els valors obtinguts per antiguitat i estat de conservació, hauria de ser 0,24 i no de 0,515.

Finalment, i com a conclusió final del present informe, un cop analitzada la valoració rebuda, havent justificat que tant el pressupost de la instal·lació com el coeficient d'antiguitat i estat de conservació aplicat, són superiors als reals, em ratifico en la "VALORACIÓ DE LA CONSTRUCCIÓ PER A ÚS ESPORTIU SITUADA A CAN COSTA, CARRETERA BP-1413, KM, 1, DE CERDANYOLA DEL VALLÈS" enviada en data 20/08/2021, per un import total de 9.657,79 €.

*Ortofoto de l'indret on s'ubica la pista de frontón*

La instal·lació esportiva es troba dins la massa boscosa que envolta les edificacions principals, per la qual cosa no es percep des de la fotografia aèria superior.

El terreny, presenta una topografia plana en la seva part central, resultat d'adaptacions topogràfiques.

L'entorn és de naturalesa rústica, allunyat del nucli urbà Cerdanyola. Els paratges on s'emplaça són eminentment de caràcter boscós. L'accés a la finca es realitza a través d'un vial al qual s'accedeix des de la carretera de Sant Cugat a Cerdanyola, i per tant, disposa de molt bona comunicació.

La finca està connectada a les xarxes de subministrament elèctric i d'aigua.

## 3.3 DESCRIPCIÓ DE VOLS I CONSTRUCCIONS

La instal·lació esportiva és una pista de frontó, de format estàndard i dimensions reglamentàries de pista de 30m descoberta de base de formigó, parets de peça prefabricada de morter i tancament perimetrals de reixa d'acer galvanitzat de torsió simple.

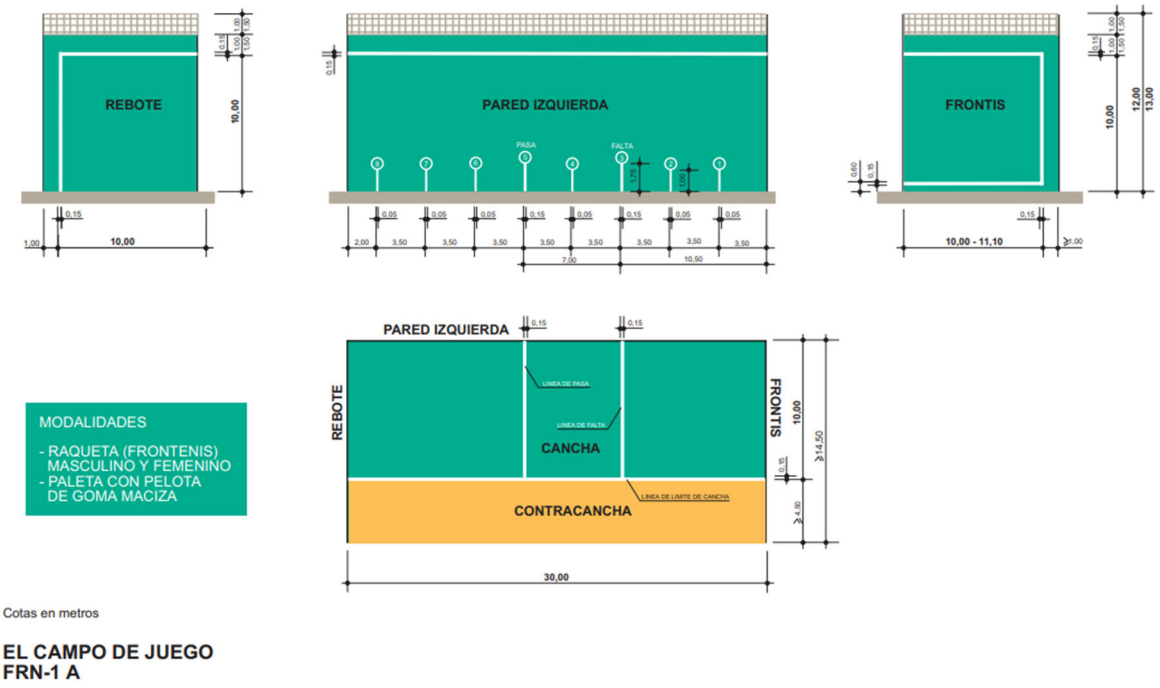

### 3.3.1 Quadre resum de superfícies construïdes

Es pren de referència una pista de frontón de dimensions oficials d'acord amb les normes NIDE, *'Normativa sobre instal·laciones y para el esparcimineto'*, creada pel *Consejo General de Deportes* depenent del *Ministerio de Cultura y Deporte*.

# 5 METODOLOGIA I CRITERIS DE VALORACIÓ

Per a la realització de la present valoració, es parteix dels següents supòsit:

1. Les construccions a valorar foren implantades legalment.
2. No es consideren vicis ocults, càrregues de qualsevol tipus.

D'acord amb el Real decret 7/2015 de 30 d'octubre, pel que s'aprovà el Text Refós de la Ley del Suelo y Rehabilitación, en el seu article 21:

> ***Artículo 21. Situaciones básicas del suelo.***
>
> *1. Todo el suelo se encuentra, a los efectos de esta ley, en una de las situaciones básicas de suelo rural o de suelo urbanizado.*
>
> *2. Está en la situación de suelo rural:*
> *(...) b) El suelo para el que los instrumentos de ordenación territorial y urbanística prevean o permitan su paso a la situación de suelo urbanizado, hasta que termine la correspondiente actuación de urbanización, y cualquier otro que no reúna los requisitos a que se refiere el apartado siguiente.*

Per tant, a efectes de valoracions, del sòl i edificacions, construccions, instal·lacions i altres vols, ens atendrem a la situació Bàsica de Sòl Rural.

D'acord amb el Real decret 7/2015 de 30 d'octubre, pel que s'aprovà el Text Refós de la Ley del Suelo y Rehabilitación, en el seu article 35, que estableix els criteris generals per a la valoració d'immobles, diu:

> ***Artículo 35. Criterios generales para la valoración de inmuebles.***
> *(...)* ***Las edificaciones, construcciones e instalaciones****, los sembrados y las plantaciones en el suelo rural,* ***se tasarán con independencia de los terrenos siempre que se ajusten a la legalidad al tiempo de la valoración,*** *sean compatibles con el uso o rendimiento considerado en la valoración del suelo y no hayan sido tenidos en cuenta en dicha valoración por su carácter de mejoras permanentes.(...)* ***Se entiende que las edificaciones, construcciones e instalaciones se ajustan a la legalidad al tiempo de su valoración cuando se realizaron de conformidad con la ordenación urbanística*** *y el acto administrativo legitimante que*

*requiriesen, o han sido posteriormente legalizadas de conformidad con lo dispuesto en la legislación urbanística.*

*La valoración de las edificaciones o construcciones* ***tendrá en cuenta su antigüedad y su estado de conservación****. Si han quedado incursas en la situación de fuera de ordenación, su valor se reducirá en proporción al tiempo transcurrido de su vida útil.*

Així, mateix, el mateix Reial Decret, estableix que per a la valoració d'instal·lacions, edificacions i construccions, s'utlitzarà el Mètode de Reposició, tenint en compte l'estat de conservació i antiguitat:

***Artículo 36. Valoración en el suelo rural.***

*(...) 1.b)* ***Las edificaciones, construcciones e instalaciones, cuando deban valorarse con independencia del suelo, se tasarán por el método de coste de reposición*** *según su estado y antigüedad en el momento al que deba entenderse referida la valoración.*

*(...) 2. En ninguno de los casos previstos en el apartado anterior podrán considerarse expectativas derivadas de la asignación de edificabilidades y usos por la ordenación territorial o urbanística que no hayan sido aún plenamente realizados.*

És el RD 1492/2011, de Valoracions de la Llei del Sòl, on, mitjançant el seu article 18, es concreta el mètode de valoració:

***Artículo 18. Valoración de las edificaciones, construcciones e instalaciones susceptibles de ser desvinculadas del suelo rural.***

***1. La valoración de las edificaciones, construcciones e instalaciones*** *que sean compatibles con el uso o rendimiento considerado en la valoración del suelo y no hayan sido tenidas en cuenta en dicha valoración por su carácter de mejoras permanentes entendiendo por tales aquellas que no hayan participado en modo alguno en la obtención de las rentas consideradas en la valoración ni sean susceptibles de generar rentas de explotación, se realizará aplicando la siguiente expresión:*

$$V = VR - (VR - VF).\ \beta$$

*Siendo:*

*V = Valor de la edificación, construcción o instalación, en euros.*

*VR = Valor de reposición bruto, en euros.*

*VF = Valor de la edificación, construcción o instalación al final de su vida útil en euros.*

*β = Coeficiente corrector por antigüedad y estado de conservación.*

*2. El valor de reposición bruto será el resultado de sumar al valor de mercado de los elementos que integran los costes de ejecución material de la obra en la fecha a la que debe entenderse referida la valoración, los gastos generales y el beneficio industrial del constructor, el importe de los tributos que gravan la construcción, los honorarios profesionales por proyectos y dirección de las obras y otros gastos necesarios para construir una edificación, construcción o instalación de similares características utilizando tecnología y materiales de construcción actuales.*

*3. El valor de la edificación, construcción o instalación al final de la vida útil, se determinará de acuerdo con las características de la misma y no podrá ser superior al 10 por ciento del valor de reposición bruto.*

*4. El coeficiente corrector β, por antigüedad y estado de conservación, será el recogido en la tabla que figura en el Anexo II, cuyo fundamento matemático es la siguiente expresión:*

1. $$\beta = 1 - \left[1 - \frac{\left(a + a^2\right)}{2}\right] \cdot C$$

*Siendo:*

*a = Antigüedad.*

*C = Coeficiente corrector según estado de conservación.*

*Como antigüedad se tomará el porcentaje transcurrido de la vida útil de la edificación, construcción o instalación. A tal efecto, se considerarán los años completos transcurridos desde la fecha de su construcción, reconstrucción o rehabilitación integral, hasta la fecha a la que deba entenderse referida la valoración y la vida útil se establecerá en función de las características de la edificación, construcción o instalación sin que pueda ser superior a los valores establecidos en la tabla del Anexo III.*

*A los efectos de la determinación de la fecha de construcción, reconstrucción o rehabilitación integral, cuando sobre la edificación, construcción o instalación se hubieran realizado obras de*

*reforma o rehabilitación posteriores a su fecha de construcción o implantación, la fecha de antigüedad de cálculo se determinará de acuerdo con la siguiente expresión:*

$$Fa = Fc + (Fr - Fc) \cdot i$$

*Siendo:*

*Fa = fecha de antigüedad a efectos del cálculo.*
Fc = fecha de construcción o implantación.
*Fr = fecha de reforma o rehabilitación*
*i = Coeficiente que contempla el tipo de reforma.*

*El Coeficiente i adoptará un valor entre 0 y 1, según el grado de reforma o rehabilitación parcial, en función del coste de las obras en relación con el total de una rehabilitación integral.*

### 6.1.2 Càlcul d'antiguitats equivalents i coeficient Beta

Per al càlcul del valor de les construccions, cal establir l'antiguitat equivalent de cada construcció així com el coeficient Beta que preveu el Reglament de valoracions.

Per al càlcul de l'antiguitat, es tindran en consideració les obres de reforma que s'hagin dut a terme, ponderant a la vegada el grau d'intervenció i la superfície d'aquesta en relació a la totalitat de l'edificació. En el cas que ens ocupa, no es consideren reformes, i per tan l'antiguitat equivalent és pròpia antiguitat de la construcció.

La vida útil màxima de cada edificació l'estableix el propi reglament de valoracions segons el quadre que preveu el reglament en el seu annex III:

**ANNEX III**

**Vida útil màxima d'edificacions, construccions i instal·lacions**

| | vida útil màxima (anys) |
|---|---|
| Edificacions i construccions: | |
| Edificis d'ús residencial | 100 |
| Edificis d'oficines i administratius | 75 |
| Edificis comercials i de serveis | 50 |
| Edificis industrials i magatzems | 35 |
| Casetes, coberts, rafals, barracons i similars de construcció lleugera fixa | 30 |
| Vials, patis pavimentats, aparcaments a l'aire lliure i similars | 40 |
| Pous | 75 |
| Infraestructures de transport sobre rails, carrils i cable | 50 |
| Parcs | 20 |
| Tancats: | |
| Fusta | 10 |
| Filferro | 20 |
| Altres | 40 |
| Instal·lacions: | |
| Instal·lacions elèctriques | 25 |
| Instal·lacions d'emmagatzematge, tractament i distribució de fluids | 35 |
| Altres instal·lacions | 20 |

L'annex II del reglament de valoracions és la taula d'on s'obtenen els coeficients Beta, d'acord amb l'estat de conservació que el propi Reglament estableix com a:

a) Normal: quan malgrat la seva edat, sigui quina sigui, es necessitin reparacions importants.
b) Regular: quan presentin defectes permanents, sense que comprometin les condicions normals d'habitabilitat i estabilitat.
c) Deficient: quan necessitin reparacions de relativa importància, que comprometin les condicions normals d'habitabilitat i estabilitat.
e) Ruïnós: quan es tracti d'edificacions, construccions o instal·lacions manifestament inhabitables o declarades legalment en ruïna.

La instal·lació esportiva de frontó, no es pot englobar en cap dels elements que preveu l'Annex III del Reglament, a efectes d'establir la seva vida útil. Per aquest motiu, s'assigna una vida útil màxima per a cada 'component' assimilant de forma lògica al seu desgast, d'acord amb les característiques següents:

- El component de Tancaments de filferro, que l'Annex III n'estableix una vida màxima útil de 20 anys, s'aplicarà al Capítol 4 i 5 de les partides.

- El component de Vials i patis a l'aire lliure, que l'Annex III n'estableix una vida màxima útil de 40 anys, s'aplicarà al la partida 2.4 Solera i al Capítol 3 Paviments.

- Finalment, la resta de la instal·lació, que correspon a murs de formigó armat i fonamentació, s'assimila al component d'Edificis d'ús Residencial que l'Annex III n'estableix una vida màxima útil de 100 anys.

D'acord amb aquesta diferenciació en 3 components que composen la instal·lació esportiva, i agrupant les partides de pressupost sota cada component, en resulta el següent:

| ***Component*** | ***Cost reposició a nou **** | | | ***Vida útil màx.*** |
|---|---|---|---|---|
| Tancaments + Eq Esportiu | 21.926,08 € | 22.194,87 € | 14,82% | 20 |

Així doncs tenim el següent quadre de Coeficients Beta, a partir del qual podrem realitzar la deguda ponderació al valor brut de les construccions i edificacions, d'acord el que estableix l'article 18 del reglament.

### 6.1.3 Valor de les construccions

Partint del valor unitari brut per a cada tipologia, del coeficient Beta que pondera antiguitat i estat de conservació, i considerant un màxim del 10% per al valor final de la vida útil, d'acord amb la fórmula que determina el reglament, ***V = VR – (VR – VF). β***

Tenim que:

| VALOR DE LA CONSTRUCCIÓ | | | | V = VR - (VR - VF) * B | | |
|---|---|---|---|---|---|---|
| Tipologia Const. | VR | VF | B | V (Valor Unitari) | tats | Valor |

## 1.OBJECTE DE L'INFORME:

L'objecte d'aquest informe és valorar l'arbrat existent dins de la zona georefernciada de Can Roca i Can Codonyers. Dins d'aquesta zona hi ha tres tipologies d'arbrat, una part és agrícola, on hi han arbres fruiters, en una altre part hi ha una explotació forestal per obtenció de fusta, i en l'altre part és una zona forestal amb bosc mediterrani.

## 2.EMPLAÇAMENT DE LA ZONA PER VALORAR:

El perímetre de la zona per valorar s'ha facilitat pels promotors de l'encàrrec i s'ha sobreposat georeferenciadament sobre ortofotomapa vigent de l'Institut Cartogràfic i Geològic de Catalunya, amb una precisió de 1 pixel = 20 cm. La superfície a valorar agafa dos quadrícules UTM, les núm. 121 i 122, ja que el perímetre de la zona per valora està tallada per dues quadrícules.

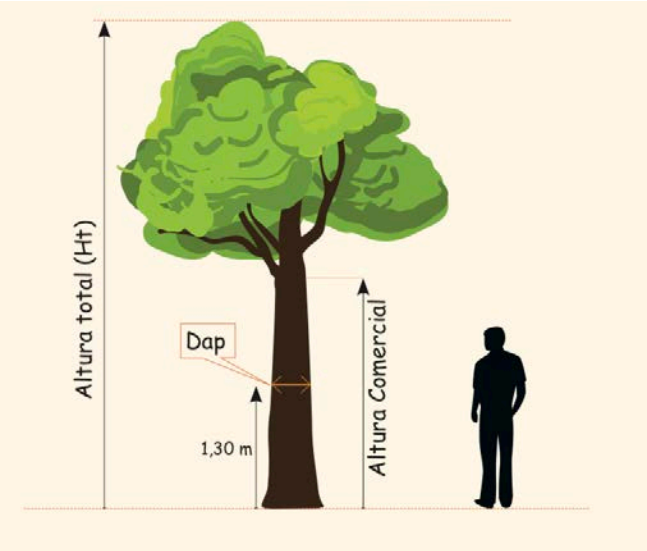

Per fer una bona mesura de les unitats de l'arbrat existent s'ha realitzat per contrast cromatogràfic sobre ortofotomapa de l'any 2020, i s'ha dividit en 8 zones per fer el recompte de l'arbrat. A cada zona que les anomenem des de la zona núm.1 fins a la zona núm.8, s'han contat els arbres existents sobre orto i s'ha fet una segona mesura al camp i en les parts amb molt sotabosc més dens, s'ha fet recompte a més detall.

## 3.MÈTODE DE VALORACIÓ:

Per valorar l'arbrat existent a Can Roca i Can Codonyers hem d'agafar el mètode de càlcul del volum de fusta de l'arbrat a peu dret a la finca. Ja que els altres mètodes de valoració, que són la producció esperada dels fruiters, i que no és viable per que els fruiters ja estan a final de la seva vida útil i no tenen producció esperada, i el mètode de valoració de la Norma Granada, tan sols s'utilitza per arbrat urbà, i que no és pot reposar, i cap d'aquest dos darrers mètodes són els adequats per aquesta valoració.

Mètode de cubicació de fusta de l'arbre a peu dret:

Per aplicar aquest mètode cal mesurar el diàmetre de l'arbre a 1,3m d'alçada i calcular l'alçada total de l'arbre.

Volum de fusta:

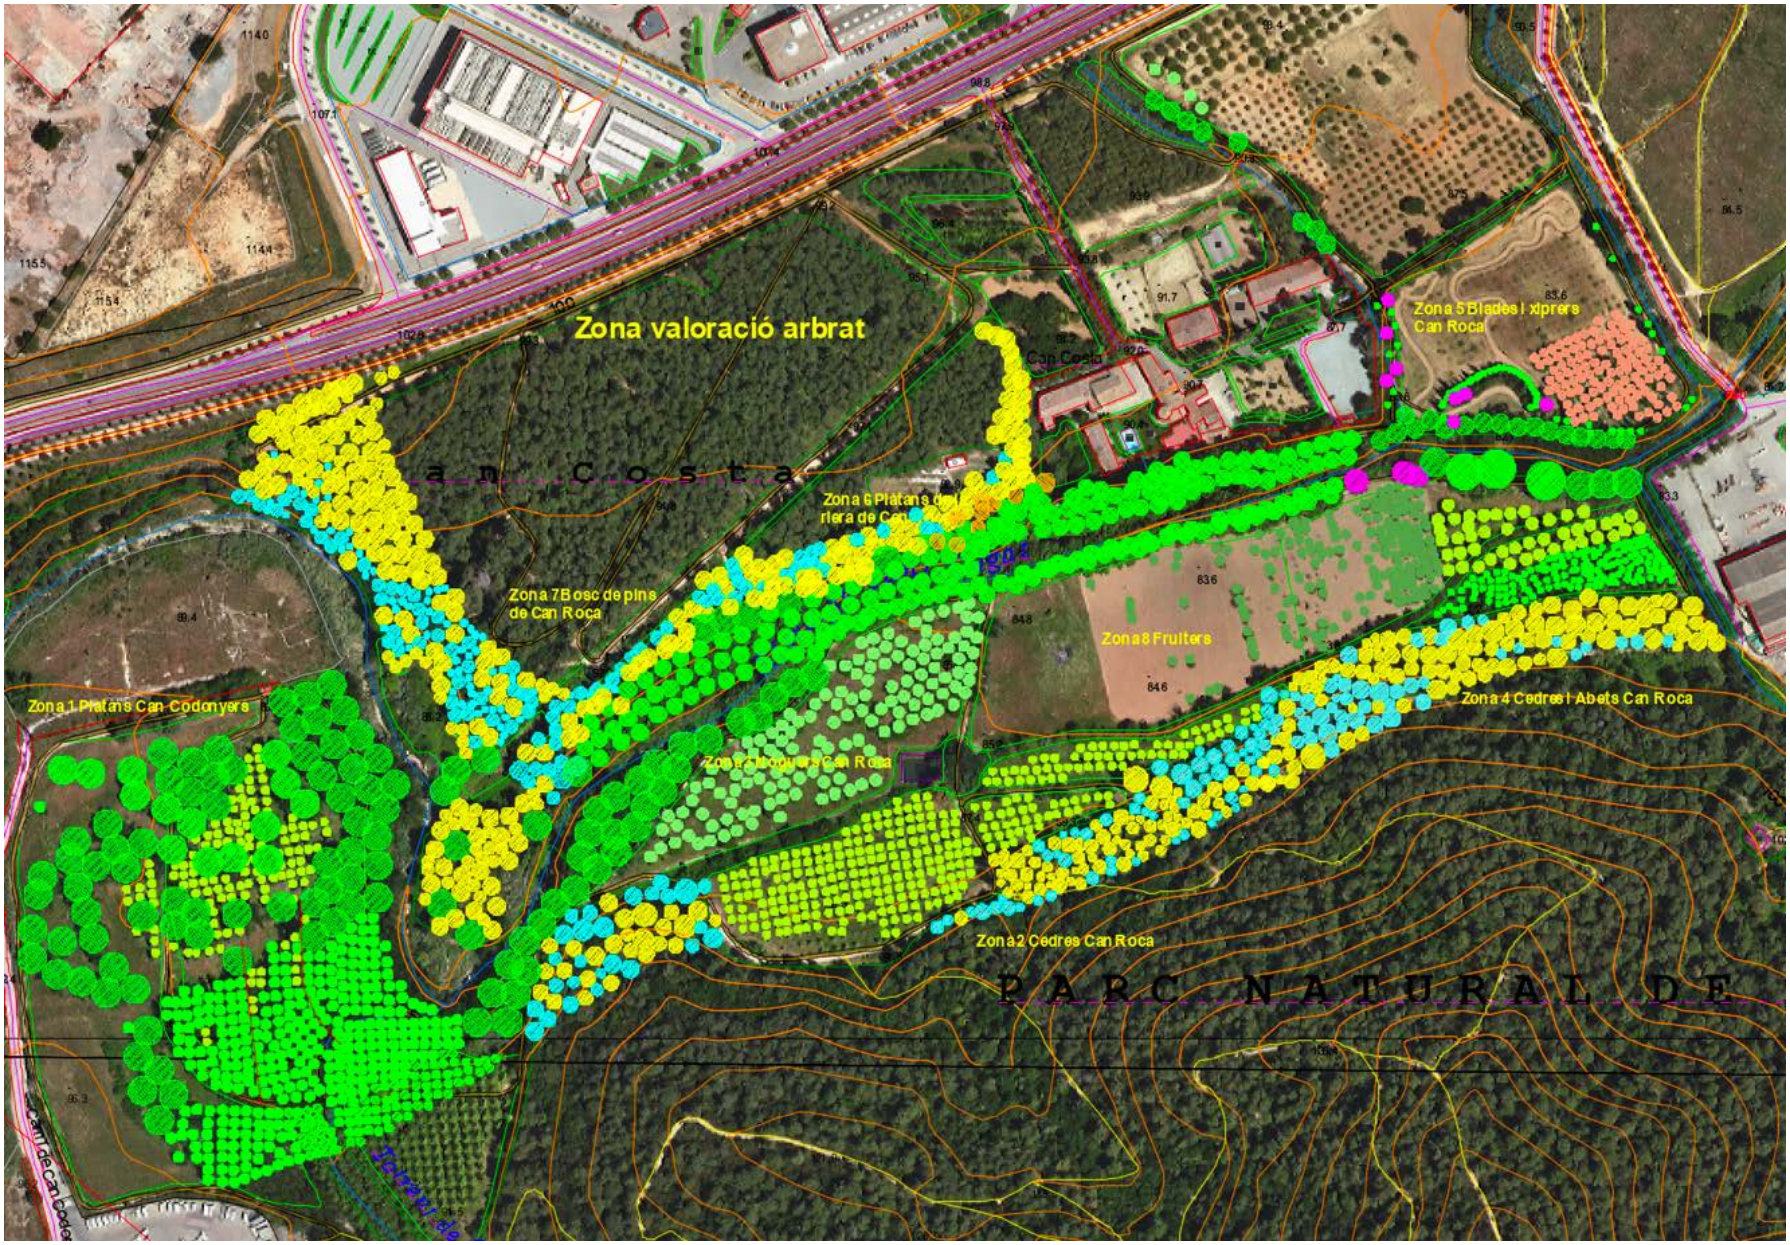

$$V = \frac{3.1415 \times (Dap)^2 \times H_c \times f}{4}$$

V = Volum de fusta de l'arbre.
Dap = Diàmetre de l'arbre a 1,3m d'alçada.
Hc = Alçada comercial de l'arbre en metres.
f = coeficient de forma = 0,75-0,95
Perímetre de tronc = 3,14xDap
